

# ABSTRACT OF THE DISCLOSURE

A method and an apparatus for constructing and operating a cyber-conference in cyberspace are disclosed.

5 The method comprises the steps of: accessing a cyber-conference operating web site provided on cyberspace; applying for registration to a cyber-conference operation server; approving the registration based on data stored on a database; and creating a cyber-conference in the  
10 cyberspace. The apparatus, which is connected to a user client and a conference client through a communication network, comprises a storage unit for storing a program, embodied on a computer-readable medium, capable of constructing and operating the cyber-conference; a  
15 database storing data related to the cyber-conference; and a server connected to the storage unit and the database.
